SUMMARY

Penultimate-year Bachelor of Information Technology student (Software Technology major) with hands-on systems experience – including running a home network's DNS/DHCP infrastructure and a 20-sensor automation system – and an ongoing freelance web development engagement that led to a referral for a second client project. Actively building algorithmic skills and drawn to low-level systems and networking. Brings reliability proven over several years of balancing full-time study with part-time operational leadership.

EDUCATION

Macquarie University

Bachelor of Information Technology, Software Technology major

Macquarie, NSW

Expected Graduation: 2027

TECHNICAL SKILLS

Languages: Java, JavaScript, HTML/CSS – currently building C/C++ proficiency

Platforms & Tools: Docker, Linux, Git, Tailscale, WordPress (Full Site Editing), Home Assistant, VS Code

Cloud: AWS Academy Graduate – Cloud Foundations (verified digital badge)

PROJECTS

CODE369 Client Website (369keys.com) | WordPress (FSE), JavaScript, Docker, Tailscale

Apr 2026 – Present

- Assessed the feasibility of the client's spec and hand-drawn wireframe – flagging what was and wasn't practical – then modernised the site's design and built a cohesive brand identity aligned with their target audience and calls-to-action
- Self-hosted the WordPress instance on a home Docker server with remote access via Tailscale, integrated e-commerce via Shopify Buy Buttons after weighing it against a full Shopify migration, and exceeded expectations enough to be engaged for a second client project

Home Lab & Automation | Docker, Home Assistant, Zigbee, DNS/DHCP, Tailscale

Apr 2026 – Present

- Repurposed a decommissioned PC into a self-hosted home server (ZimaOS/Docker) providing 1TB of storage and photo backup (Immich), and configured AdGuard Home as the network's DHCP/DNS server for network-wide ad-blocking
- Built a 20-sensor Zigbee temperature network, extending mesh range with smart-plug repeaters, to calculate whole-home average temperature and automate blinds based on time of day and indoor/outdoor temperature
- Automated lighting, fans, and air purifiers via Tuya smart plugs and an IR blaster triggered by air-quality sensor readings, and monitored major appliance power usage; managed the full stack remotely over a Tailscale VPN

EXPERIENCE

Relieving Shift Manager

Sep 2023 – Present

ALDI

Belrose/Stanhope, NSW

- Balance full-time study with an average of four shifts a week, taking ownership of daily store operations
- Contributed to raising store ranking from 156th to 52nd statewide by helping drive audit scores from 60% to a sustained 100% across every monthly audit for a full year

After School Facilitator

Apr 2023 – Jun 2024

Code Camp

St Ives, NSW

- Provided one-on-one technical support and debugging help to students learning a game development platform, translating technical concepts for an audience of up to 40 children

Additional Experience: Customer Service Officer, Booktopia (2022) · Retail Sales Associate, UNIQLO (2022) · Senior Hall Staff, Gyutei Yakiniiku (2020–2022) · Shop Manager, Plaster Fun House (2015–2020) · Electronic Engineer Apprentice, Yuraj Electronic Engineering (2018)
